p.2

Amendments to the Claims

Please amend claims 1 and 11 as shown below.

Guy Donatiello

- (Currently Amended) A method for treating non-neuropathic pain comprising topically administering a composition containing 4-6% lidocaine to a patient near a pain locus in an amount sufficient to produce analgesia without causing anesthesia wherein said composition is incorporated into a topical patch for application to skin.
 - (Cancelled)
 - 3. (Cancelled)
 - 4. (Cancelled)
 - (Cancelled)
 - 6. (Cancelled)
 - 7. (Cancelled)
- (Original) The method of claim 1 wherein said non-neuropathic pain to be treated results from a soft-tissue injury.
- (Original) The method of claim 8, wherein said soft-tissue injury is selected from the group consisting of pain associated with ligaments, tendons, muscles, bursa, sprains, strains, inflammations, contusions, arthritises, and post-surgical pains.
- (Previously Amended) The method of claim 1 wherein said non-neuropathic pain 10. is derived from one or more conditions selected from the group consisting of myofascial pains, fibromyalgia, bursitis, costrochondritis, repetitive motion injuries, carpal tunnel syndrome, and nociceptive pain.
- (Currently Amended) A method for treating non-neuropathic pain comprising the 11. step of:

topically administering a [transdermal] patch containing a pharmaceutical composition consisting of 5% lidocaine as the only active ingredient, and the remainder consisting of inactive pharmaceutically acceptable materials.

(Previously Added) A method for treating non-neuropathic pain comprising topically administering a composition containing 4-6% lidocaine as the only active ingredient to a patient near a pain locus in an amount sufficient to produce analgesia without causing anesthesia.

- 13. (Previously Added) The method of claim 12 wherein said non-neuropathic pain is derived from one or more conditions selected from the group consisting of myofascial pains, fibromyalgia, bursitis, costrochondritis, repetitive motion injuries, carpal tunnel syndrome, and nociceptive pain.
- 14. (Previously Added) The method of claim 12 wherein said non-neuropathic pain to be treated results from a soft-tissue injury.
- 15. (Previously Added) The method of claim 14, wherein said soft-tissue injury is selected from the group consisting of pain associated with ligaments, tendons, muscles, bursa, sprains, strains, inflammations, contusions, arthritises, and post-surgical pains.
